

Team Assisted Individualization (TAI) Math (Mathematics)

Elementary School

TAI Math has strong evidence of effectiveness for elementary school mathematics. The three qualifying studies included in this review showed effect sizes of +0.28, +0.38, and +0.14.

Middle/High School

TAI Math has not been assessed for middle/high school mathematics.

About TAI Math

TAI Math is a structured cooperative learning program in which students work on individualized materials in four-member teams.
